

## BELLEVUE BAPTIST CHURCH –MISSION CENTRAL, WEST LOBBY, WORSHIP CENTER

### LOCATION

Cordova, TN

### SERVICES

Architecture, Interior Design, Construction Administration

### SIZE

Mission Central 4,600 SF / West Lobby 21,975 SF / Worship Center 67,700 SF

### CONSTRUCTION COST

Mission Central \$255,000 / West Lobby \$1,100,000 / Worship Center \$1,900,000

### CONTRACTOR

Metro Construction

### COMPLETED

Mission Central 2012 / West Lobby 2013 / Worship Center 2014

### LEED CERTIFIED

No

### REFERENCE (CLIENT)

Dr. Steve Gaines, Pastor

Originally conceived as part of a multi-phase master plan to relax the formal atmosphere of the church's initial construction, these projects were overseen by three different committees and built over four years. The initial phase provided a high profile space to celebrate the church's many and varied mission programs, as well as to demonstrate a new, more natural finish palette. The second phase transformed a "move-through" lobby into a comfortable place for gathering, adding plentiful seating, improving wayfinding, and introducing a coffee café. For the third phase, Fleming worked with both Bellevue and Paragon 360 and focused on the 6,000-seat worship center. A major upgrade to the lighting system is the most visible change, along with new finish materials. A newly flattened stage improves flexibility, allowing for significant shifts of equipment and layout between services. A new modular choir riser system supports better acoustics during Sunday performances while also providing a framework for performance set pieces and non-worship events. Small changes add up to major improvements at Bellevue.

“Fleming Architects and Paragon 360 are the best design team I have ever worked with.”

- MARK ALEXANDER, DIRECTOR OF DESIGN SERVICES BELLEVUE BAPTIST CHURCH
